FOR SPECIAL TRANSPORT

At Trainar, we don't just sell special transport trailers—we guide and advise you toward the best choice.

Forget about technical jargon and confusing options. Thanks to our product expertise, we present you with available options, explaining the pros and cons of each so that together we define the equipment that best suits your needs.

Your industry? It doesn't matter. Whether it's wind energy, public works, agriculture, heavy metal fabrication, or any other sector, we have the ideal solution for you.

USED EQUIPMENT STOCK

At Trainar, we understand that **used trailers can sometimes be the best choice** in terms of availability and budget. However, the market is full of offers where the actual condition of the equipment remains unknown.

Over the years, we have seen customers disappointed after purchasing from large "second-hand vehicle supermarkets," only to discover cracked chassis, welds hiding wear and tear, or poorly executed repairs.

Unlike other sellers who may not be aware of the condition of what they sell, Trainar inspects all used equipment, paying close attention to aspects such as extensions, steering, hydraulic suspension, and lubrication systems. We determine whether immediate repairs are necessary or whether the decision should be left to the buyer.

We offer complete transparency: You will receive a detailed inspection report and, if you wish, you can personally inspect the equipment in our workshop.

Do other sellers offer the same level of transparency?

ORIGINAL SPARE PARTS

When your vehicle is out of service and requires a specific manufacturer part, every minute counts. The faster you receive it, the sooner you're back in operation. With this in mind, we handle all spare part orders efficiently.

Trainar supplies genuine spare parts, not only for the brands we represent but for all makes and models of special transport trailers.

Trust our After-Sales and Spare Parts Department to quickly and efficiently find the exact part you need. We are here to help.

CONTACT AFTER-SALES

We have the part your trailer needs.

REPAIR WORKSHOP

Our years of experience in repairing specialized trailer systems, particularly steering and hydraulic suspension systems, are complemented by direct guidance from the after-sales departments of the brands we work with. This enables us to diagnose and resolve breakdowns precisely and quickly.

Additionally, we collaborate with trusted suppliers for highly specialized work, such as painting, part machining, and structural welding repairs.

Contact us to schedule an appointment.

Our expertise and added value lie in the repair and maintenance of:

- Hydraulic steering systems
- Hydraulic suspension systems, including through axles and pendular axles
- Hydraulic systems in trailers and platforms: extendable beds, hydraulic goosenecks, etc.
- Modular equipment
- Automatic greasing systems
- Regular maintenance
- Pre-ITV inspection

**“Your special transport trailer,
always operational.”**

DOCUMENTATION & HOMOLOGATION

At Trainar Trailers, we understand that these procedures can be complex and tedious, which is why we offer a specialized documentation service for your trailer.

Our team of experts provides personalized guidance to ensure your equipment complies with current legal requirements.

We offer:

- Technical documentation for special transport permit applications
- Certification for imported trailers to meet Spanish regulations
- Modifications and upgrades following the installation of additional equipment after registration
- And more!

“ Making your journey easier.

TRAINING & USE

When delivering a **new or used trailer**, we recommend that **both the driver and the company's maintenance personnel** be present.

It is essential for the driver to **understand how the equipment's systems work**, as most breakdowns occur on the road or at the final destination, often when the driver is alone or only accompanied by the pilot car driver. With this knowledge, drivers can **solve issues while in transit**.

Additionally, having maintenance personnel present during delivery helps assist the driver with any handling questions and **establish a preventive maintenance plan** based on the information provided. This shared understanding **enables quicker problem resolution** or even prevents failures before they occur.

“ Know the what, how, and why of your trailer.

WE SELL YOUR EQUIPMENT

***Do you want to sell your special
transport trailer?***

If you have a special transport trailer or equipment you want to sell, contact us.

You can reach us by phone, email, or through our website, providing detailed information and photos of the equipment you want to sell.

At Trainar, we will review the information to present you with our best offer or offer our Sales Management Service, where we leverage all our resources to facilitate the selling process.
